

# Potential Day Care Center for Higher Income Families in Frisco

Best Location for a New Daycare Center:

1. Family income greater than \$200,000
2. Highest child percentage (children <6 years old)
3. Area with no competition

Steps taken for metadata:

1. Downloaded the high income (B19001) and age (P38) tables from the US Census Bureau
2. Joined each table to their own census tract
3. Also normalized both layers.
4. Created a spreadsheet and geocoded day care centers currently in Frisco.
5. Downloaded the City of Frisco zoning shapefile and clipped all layers to only show Frisco data.
